## 1. Release 2 of Altova MissionKit Version 2014

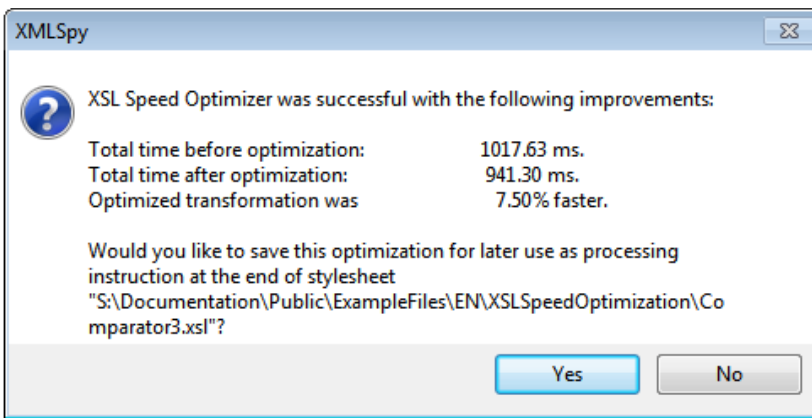

We are excited to announce the availability of our [Release 2 of Altova MissionKit 2014](#) and complete line of XML, SQL, and UML desktop developer tools! Version 2014 Release 2 (v2014r2) introduces a revolutionary new XSL Speed Optimizer in XMLSpy, as well as numerous new features and enhanced functionality across the product line to improve performance, address customer requests, and provide extended standards support for XSLT, XQuery, and XBRL.

Read on for more details below, and visit the [What's New](#) page for more information.

### New in XMLSpy® 2014 Release 2

- XSL Speed Optimizer
- Large number of new Altova extension functions
- Additional support for XSLT 3.0
- Completed support for XQuery 3.0
- XBRL Table Linkbase editor
- New commands for XBRL Formula execution and XBRL Table generation
- Ability to provide custom error text for XML Schema 1.1 assertions
- Support for integration with Visual Studio 2013

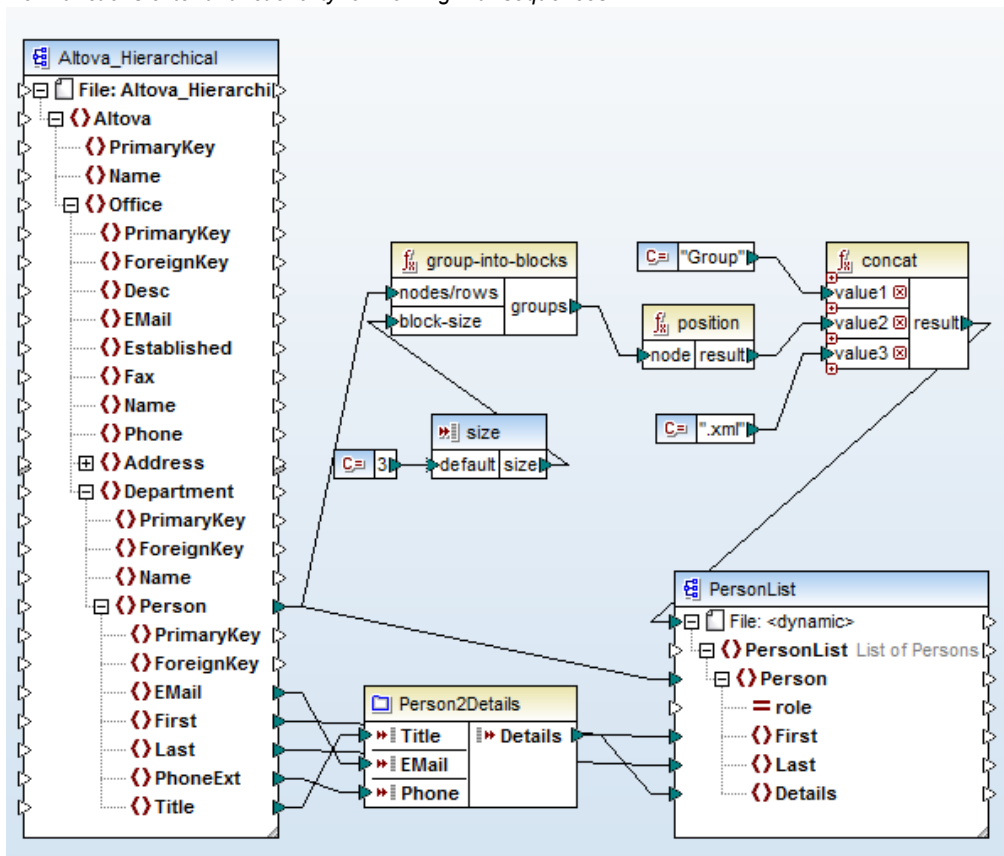

*XSL Speed Optimizer analyzes XSLT and derives an optimization strategy that can be saved with the XSLT stylesheet:*

## New in MapForce® 2014 Release 2

- Support for CDATA generation in XML files
- New functions for processing and generating sequences
- Timeout settings for Web services calls and database execution
- Improved mapping validation and editing help
- Support for integration with Visual Studio 2013

*New functions extend functionality for working with sequences:*

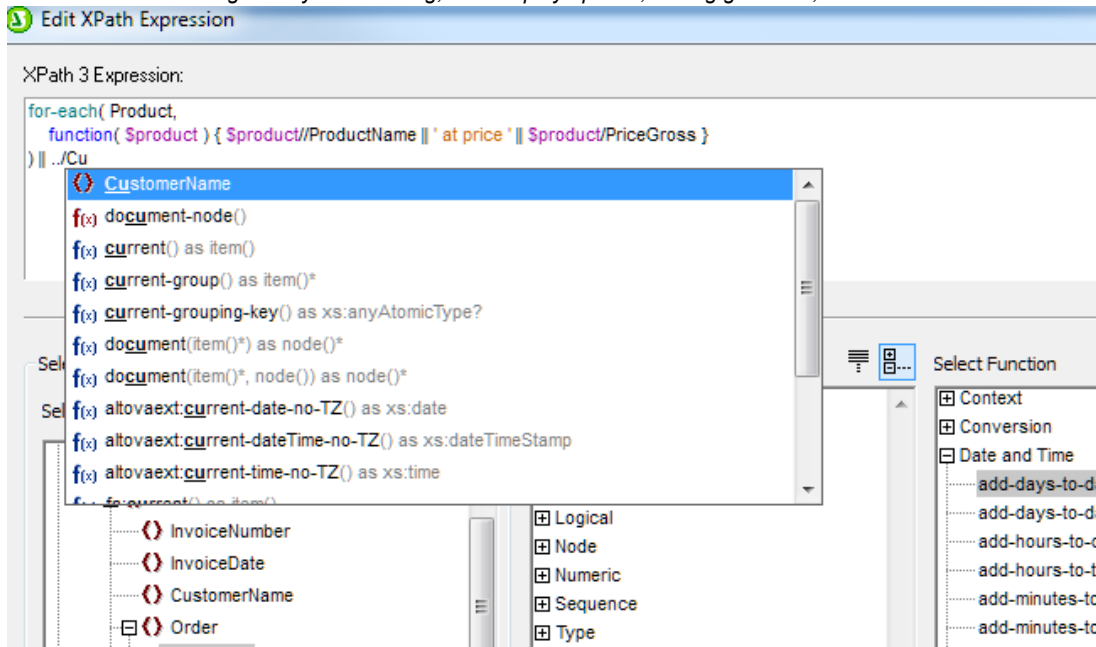

## New in StyleVision® 2014 Release 2

- Powered by RaptorXML

- Support for XSLT 3.0 and XPath 3.0
- Enhanced XPath dialog
- Support for Altova XPath extension functions
- Integration with Visual Studio 2013

*Enhanced XPath Dialog with syntax coloring, new display options, editing guidance, and more:*

## New in Authentic® 2014 Release 2

- Integration with Visual Studio 2013

## New in UModel® 2014 Release 2

- Integration with Visual Studio 2013

Read more about [what's new](#) in Release 2 of Version 2014.

### Update Now

Version 2014 Release 2 is an included update for Altova customers with an active Support and Maintenance Package. [Update now!](#)

As always, a [30-day trial](#) is also available.

## 2. Release 2 of Altova Server Software Version 2014

Also available is release 2 of Version 2014 of Altova's new line of cross-platform server software products optimized for today's high-performance, parallel computing environments. v2014r2 provides important new functionality that increases performance, as well as updated standards support for XSLT, XQuery, and XBRL.

Details are below, with complete information on the [What's New](#) page.

## New in RaptorXML® Server 2014 Release 2

- Significant speed increase for XML validation - up to 2 times\* faster

- Significant speed increase for XBRL validation - up to 3 times\* faster
- XBRL Table Linkbase support
- Completed support for XQuery 3.0
- Extended XSLT 3.0 support
- Support for additional Altova extension functions for XSLT and XQuery processing
- Support for custom error messages for XSD 1.1 assertions
- Support for Mac OS X 10.9

## New in FlowForce® Server 2014 Release 2

- Job caching enhancements
- Support for Mac OS X 10.9

Multiple new caching options speed delivery of output:

### Caching Result

Cache the result *Cache is used whenever this job is called from another job.*

- Add a time trigger to create and refresh the cached result or check "Initiated by consumer" option below.*
- Create a job that will call this one and will benefit from the cache.*
- If "Initiated by consumer" option is chosen then add Refresh or Purge Cache timers to prevent cache entries to become too old.*
- In case of job input parameters present set "Initiated by consumer" option and set "Maximum number of cache entries" to expected number of possible variations of input parameters.*

Initiated by consumer

Maximum number of cache entries:

Cache consumer job [/public/extremeGrouponRW.cached](#) is available via HTTP at URL:  
 http://<FlowForce server>/service/

## New in MapForce® Server 2014 Release 2

- Bulk insert for databases - up to 10 times faster\* than individual insert statements
- Support for Mac OS X 10.9

## New in StyleVision® Server 2014 Release 2

- Support for Mac OS X 10.9

### Update Now

Version 2014 Release 2 is an included update for all current customers of Altova Server Software. [Update now!](#)

Or, if you haven't tried Altova Server Products, a [30-day trial](#) is also available.

## 3. Special Discount XBRL International Conference

As an Altova customer, you can save 15% on your registration and join us at the XBRL International Conference, June 9 - 11, 2014 at the Renaissance Orlando at SeaWorld. Altova is sponsoring "Better Data For Better Decisions - Connect. Share.

Learn." It's a great opportunity to learn how structured data has made policy makers, accountants, and investors worldwide successful at making governments accountable, enhancing transparency and efficiency, and using complex data to make better decisions.

Use code ALTOVA on new registrations completed before Monday, May 26, 2014 to save 15% at <http://conference.xbrl.org/>. This offer cannot be combined with other discounts.

\* Performance results based on Altova internal tests conducted on a typical selection of files comparing Version 2014r2 to the prior version of the server software. Your results may vary.
